Freightliner Severe Duty 114SD 12-15 (For USA)

INSTALLATION INSTRUCTIONS

1.

2.

3.

4.

Please read all of the instructions and look at the pictures before attaching the ProClip.

1. Use the enclosed alcohol pad to clean the area where the ProClip is to be installed. Remove the screw above the air vent. Peel off the cover of adhesive tape on the ProClip. Use your left hand to pull the top part of the panel frame towards approx. 15 mm (1/2 inch). Hook the angled edge on the right side of the ProClip around the panel frame edge.

2. Align the ProClip over the screw hole. Push the panel frame back into place and screw the screw just a few threads into the screw hole.

3. Using your left hand again, pull the panel frame slightly towards you. Push forward on the left side of the ProClip so the angled edge hooks around the panel frame edge. Push the panel frame back into place and secure it and the ProClip by tightening the screw.

4. The ProClip is in place.
